

About the project

Migration has always been a part of European history and European identity. In this project we would like to make students aware of the concept of migration in modern society. We want to show how Europe, to a large extent, is a result of ongoing migration and integration processes. We see that migration is an old phenomenon that primarily has positive effects on the countries involved. To understand the present situation we must also understand the past. We need to widen our horizons and for the students and their families taking part in the project to understand the importance of migration and the positive effects of it. Cultural exchange between countries is one of the key elements of progress and innovation.
